PROFESSIONAL SUMMARY

Recent Electronics and Instrumentation Engineering graduate (June 2026) from Siddaganga Institute of Technology, Tumakuru. Comfortable working across Linux (about 1 year of use) and Windows (3+ years), with efficient command-line skills in CMD, PowerShell, and Linux Terminal. Uses AI tools to work faster and improve productivity. Writes Python and SQL for practical problem-solving and translates technical issues into clear documentation. A hands-on problem solver who learns by building and debugging systems, with academic project and internship exposure to structured troubleshooting and QA documentation. Seeking to apply a structured, detail-oriented approach to an L1 Technical Support, Managed Services, or Systems Analyst role. Available for immediate hiring.

CORE IT SKILLS

Technical Support & Troubleshooting: Systematic fault diagnosis, multimeter-based hardware troubleshooting, sensor/system calibration, root-cause analysis, UART/I2C/SPI interfacing

IT Systems & Infrastructure Exposure: Linux (Ubuntu) - about 1 year of hands-on use, Windows - 3+ years, proficient with command-line tools (CMD, PowerShell, Linux Terminal), Industrial Automation, Delta PLC/WPL Soft, MATLAB, LabVIEW

Networking & Cloud: Networking Basics - certified, Cisco Networking Academy (Jan 2025); hands-on Packet Tracer lab - configured and monitored a simulated branch-office network (3 hrs, May 2025); Computer Networks & Cloud Computing coursework

Programming & Data: Python - Basic (HackerRank Certified), SQL - Intermediate (HackerRank Certified), C++ (Intermediate), Git

Productivity & AI Tools: Efficient use of command-line interfaces for daily tasks, leverages AI tools to speed up troubleshooting, documentation, and task completion

Documentation & Quality: Inspection checklists, test-parameter documentation, production batch records, QA workflows, Microsoft Excel

Communication & Problem Solving: Cross-team coordination, technical writing, structured issue documentation in a defence-grade regulated environment

TECHNICAL EXPERIENCE

Engineering Intern - Quality & Operations (Observation & Documentation)

Jan 2026 - May 2026

Bharat Electronics Limited (BEL), Bengaluru

- Observed how electronic sub-assemblies are tested and quality-checked inside a strict, defence-grade manufacturing environment, gaining exposure to systematic fault detection and Standard Operating Procedures (SOPs).
- Documented test parameters, inspection checklists, and component specifications across several production batches - a discipline directly relevant to ticket and issue documentation in a support environment.
- Studied PCB inspection procedures and QA workflows used across defence electronics production lines, building a working understanding of formal QA and incident-logging processes in a regulated setting.

HANDS-ON PROJECTS

Real-Time Safety System in Elevator During Power Failure

2025 - 2026

Siddaganga Institute of Technology

- Built and integrated a multi-component embedded system (load cell/HX711 amplifier, Arduino Nano, GSM module, HC-12 transceivers), coordinating hardware and firmware to function as a single reliable unit.
- Configured automated failover logic and real-time alerting (SMS via GSM), analogous to incident-detection and notification workflows in IT support.

Development of Multichannel Stethograph

2024 - 2025

Siddaganga Institute of Technology

- Interfaced four synchronized sensors with an ESP32 and streamed data to a Raspberry Pi for real-time processing in Python, then extracted time- and frequency-domain features to assess signal quality.
- Built a Python/Tkinter GUI to display live heart-sound waveforms for real-time monitoring.

EDUCATION

B.E. - Electronics and Instrumentation Engineering (EIE)

Graduated: June 2026

Siddaganga Institute of Technology (SIT), Tumakuru

CGPA: 6.57 (Semester GPA trending upward: Sem 2 - 6.00, Sem 4 - 7.00, Sem 6 - 7.83, Sem 8 - 8.69)

- Relevant coursework: Computer Networks, Cloud Computing, Computer Operations

CERTIFICATIONS & LEADERSHIP

Certifications: Networking Basics - Cisco Networking Academy (Jan 2025); Exploring Networking with Cisco Packet Tracer, hands-on lab - SIT (May 2025); Microsensors and Nanosensors (NPTEL); Electronic Systems for Diagnosis (NPTEL)

Leadership: Volunteer Coordinator, Technisium Technical Fest (2023 & 2024), SIT Tumakuru
